## Testimonials

"What we both got from working with Janet was clarity over being able to maintain the integrity of our piece of land with all its biodiversity but still have a more structured and manageable garden."

*Rebecca and Chris, Killarney.*

"We were very happy with the services of Emerge Environmental Design and felt that all of our requirements were professionally and sensitively incorporated into our garden design"

*David and Emer, Galway.*

We offer a bespoke design service through our extensive experience of landscape, environmental, engineering and planning.

Wildlife Garden and  
Wetland Design

## Our Mission

Emerge Environmental Design inspire environmentally responsible homeowners to enjoy their garden again, retain the feeling of wilderness while making their garden manageable by providing a professional garden design service so that they can work at their own pace, create a wildlife centered haven and extend their living space into one that relaxes, inspires and educates.

# "Design with Nature"

Janet Laffey established Emerge Environmental Design to provide environmentally responsible homeowners with an ecological garden design that allows them to work at their own pace and budget constraints to retain a sense of wilderness while also making the garden more manageable. People are highlighting a growing need for change and responsibility in the way we look at our gardens and surrounding landscapes so that we protect our environment from pollution and flooding.

Landscape Design isn't just about making land "pretty". Landscape is a multifunctional, living, breathing organism and we as humans have a responsibility to work with nature rather than trying to control it so we can create a haven for wildlife in an era of intensive farming and increasing pollution.

True Landscape design incorporates wildlife, water, soil, vegetation as well and our inherent need as people to connect with nature on a deeper level which can relieve our daily stresses both physically and mentally.

*Landscape Design that allows the client the flexibility to work at their own pace and budget.*
